

THREE LEADERS. THREE PILLARS. ONE ACADEMIC BENCHMARK

Setting the Standard in Advanced Aesthetic Education

4–5 July, 2026 | Athens, Greece

THE EXPERIENCE

TWO DAYS. THREE GLOBAL LEADERS.

One unified academic framework redefining how advanced aesthetic medicine is taught and practiced.

THIS IS NOT A CONGRESS.

**THIS IS STRUCTURED,
ANATOMY-DRIVEN MASTERY.**

Participants are divided into 3 GROUPS and rotate through 3 INTENSIVE 3-HOUR pillars. By the end of the program, every physician will have completed:

1. Cadaveric anatomical dissection
2. Energy-based lifting integration
3. Live injectable strategy execution

DR STEVEN DAYAN

DR SABRINA FABI

DR ANDREAS NIKOLIS

THE THREE PILLARS

I. ANATOMY

Cadaver Lab Precision
at Its Highest Level

Small-group dissection. Direct faculty supervision. Real anatomical depth.

- Layer-by-layer structural analysis
- Vascular mapping & high-risk zones
- Injection planes correlated with real tissue
- Translating anatomy into predictable outcomes

Because safety begins beneath the surface.

II. ENERGY-BASED LIFTING

The Non-Invasive
Structural Dimension

Live Demonstration, Microfocused
Ultrasound for Deep Structural Lifting

- SMAS-level targeting with real-time imaging
- Vector design & depth precision
- Lift. Volumize. Combine.
- Evidence-based protocols: brow, jawline, neck
- Integrated within a full-face treatment algorithm.

Integrating energy-based lifting into a comprehensive full-face algorithm.

III. INJECTABLE STRATEGY

From Structure
to Regeneration

Live patient treatment in a controlled
academic setting.

- Hyaluronic Acid & Biostimulation
- Structural vs regenerative decision-making
- Layering strategies & facial harmony design
- Complication prevention through anatomical clarity

Technique elevated into strategy.

DAY 1. SATURDAY

Morning Plenary

09:00 – 09:15

Opening Remarks & Scientific Vision

09:15 – 10:15

Clinical Prioritization in a Saturated Aesthetic Market

10:15 – 11:00

Moodceutical™ Science & Oxytocin-Inspired Pathways

11:00 – 11:15 Coffee Break

11:15 – 12:00

GLP-1 Patient Transformation & Facial Implications

12:00 – 13:00

Hormonal Aging, Menopause & Aesthetic Medicine

13:00 – 14:00 Lunch

14:00 – 17:00

The Three-Pillar Clinical Lab (3 Hours)

Participants rotate in structured, limited-size groups across three pillars.

Anatomy | Energy-Based Technology | Injectables

DAY 2. SUNDAY

09:00 – 12:00

The Three-Pillar Clinical Lab (3 Hours) - Second rotation

12:00 – 13:00 Lunch

13:00 – 16:00

The Three-Pillar Clinical Lab (3 Hours)- Final rotation

16:00 – 17:00

Faculty Panel & Advanced Clinical Q&A

Real decision-making

17:00 Closing Remarks & Certification Ceremony

WHY THIS COURSE IS DIFFERENT

- Direct mentorship within a limited cohort
- Cadaver-based validation of every injectable plane
- Live technology integration
- Rotational learning ensuring full-spectrum exposure

**This is where anatomy, injectables, and energy converge
into one strategic clinical philosophy.**
